

Duplex 2205 glass spigot is suitable for the surroundings where the seaside is nearby and around the salt pool fence. This material is highly corrosion-resistant in extreme weather, such as big snow, wind and rain.

**Features:**

1. It is very easy to have the spigot installed and you don't need to remove the glass when you want to change the spigot.
2. There are no holes required in the glass panel.
3. The spigot is made by casting, which is strong enough to hold the glass and we can do a perfect finish, such as mirror finish and brushed finish.
4. The spigot is flexible to suit 10-13.52mm glass.
5. We welcome trial order and mass production.
6. It can be on concrete decking and timber decking.
7. Cover, inner silicon plate and screws included.
