The image displays four distinct metal fasteners arranged on a light-colored surface. From left to right, they are labeled in red text as RBM, SBM, RCM, and SCM. RBM and SBM are smaller, flange-based fasteners. RCM and SCM are taller, more complex fasteners with multiple mounting points. Below the RCM and SCM labels are two circular metal components, likely washers or spacers, corresponding to the fasteners above them.

1. The purpose of this test is to determine the mechanical properties of the material.

2. The test was performed in accordance with the requirements of the standard.

3. The results of the test are as follows:

Results Summary
 (For details of individual tests, refer to the tables on the following pages.)

ID	Item/Heat No.	Dimensions/Type/Details	Finish	Overall Assessment
14117/01	SSBM316	180mm High, 50mm Square, Base Plate 316 Stainless steel	316L	COMPLIES

Remarks

After completion of the testing, the spigot was found to be in sound condition with no breakage, tearing or signs of fracture and no looseness of the fixings.

Colin Lorrimer
 Metallurgical Testing Manager

Accreditation No. 1444
 Accredited for compliance
 with ISO/IEC 17025

4. The test results are as follows:

-Pc 20. The test results are as follows:

-5-3) 15-10) The test results are as follows:

packing	plastic bag+box+carton
production lead time	30-45 days ; also depending on your qty.
Shippment	 
	 
	 
payment
