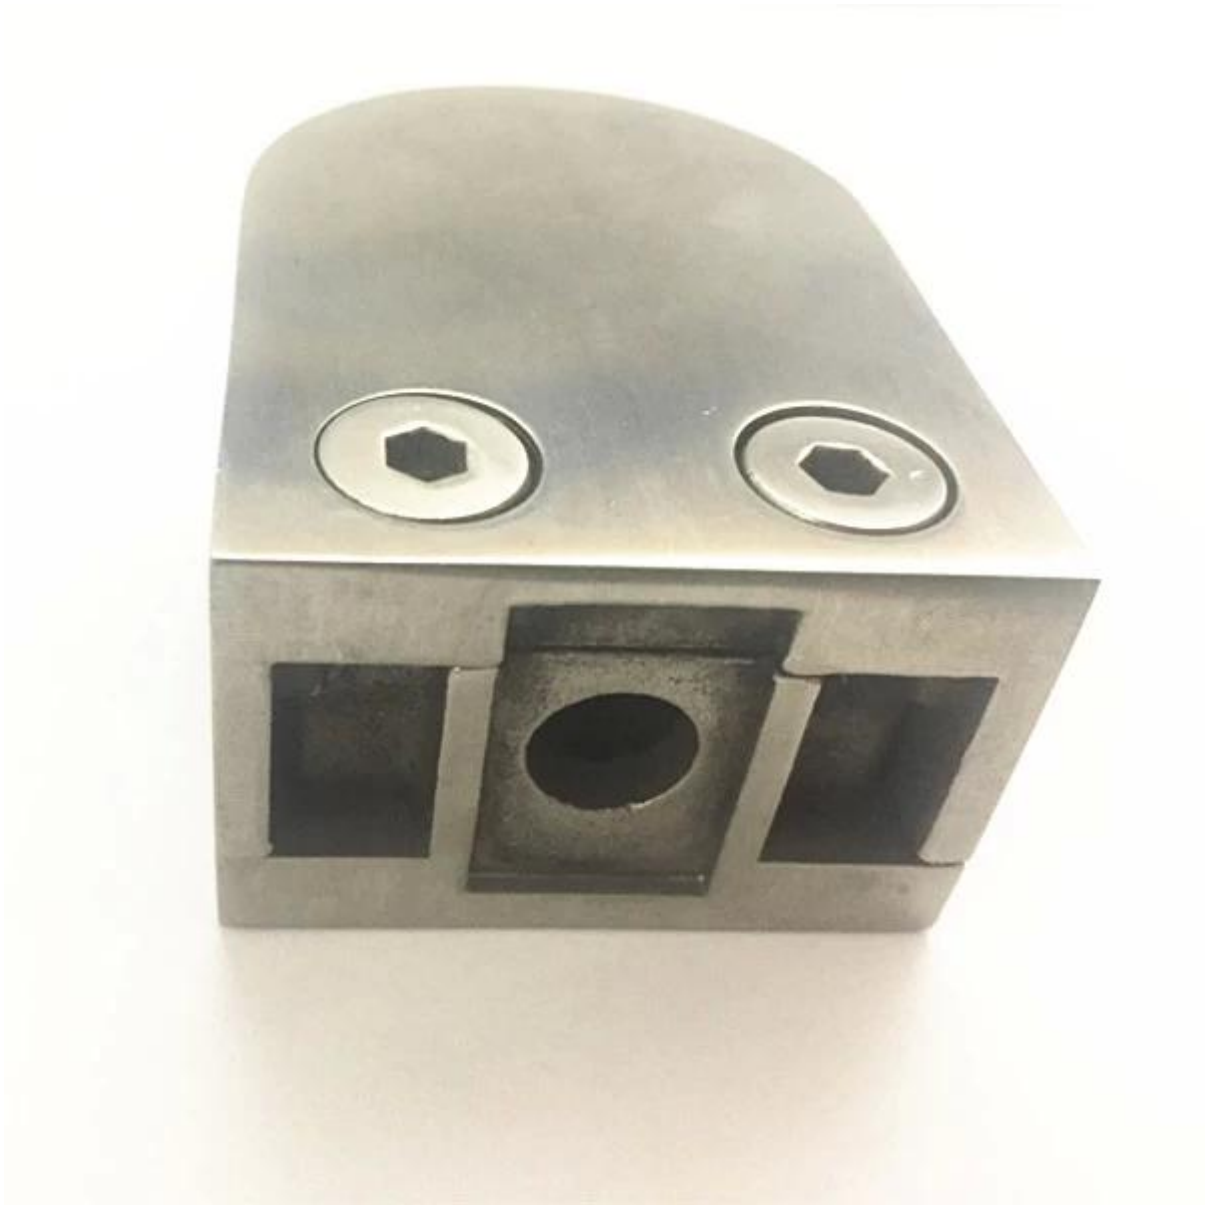

Figure 1: A metal part with a curved top and a flat bottom. The top surface has two circular holes with hexagonal inserts. The bottom surface has a central circular hole and two rectangular slots on either side. The part is made of a light-colored metal, possibly aluminum or steel, and is set against a plain white background.

The part is made of a light-colored metal, possibly aluminum or steel, and is set against a plain white background.

Handrail and glass balustrade system.
