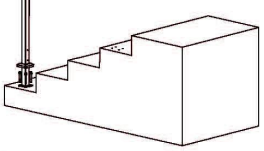
Installationsanleitungen:

Guard Rail Assembly Instructions

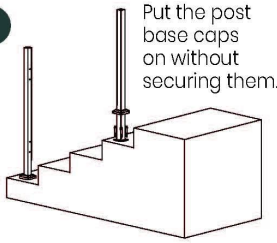
Tools Required: Electrical Power Drill (Impact Drill Preferred)

Overview: Assemble the rail and position it before marking holes for drilling. Improper installation can lead to failure of rail system or injury.

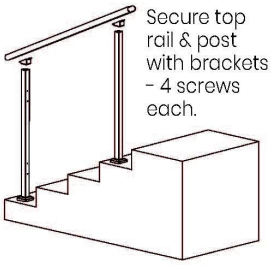
1. Roughly position the 2 posts.



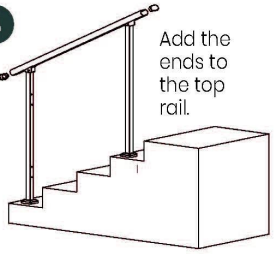
2. Put the post base caps on without securing them.



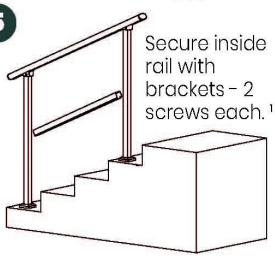
3. Secure top rail & post with brackets - 4 screws each.



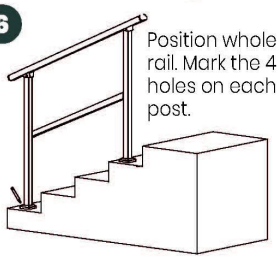
4. Add the ends to the top rail.



5. Secure inside rail with brackets - 2 screws each. [1]

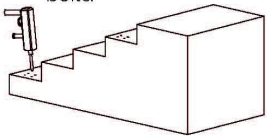


6. Position whole rail. Mark the 4 holes on each post.

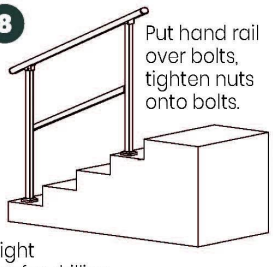


[1] Inside rail will be lose until each post is secured to the ground.

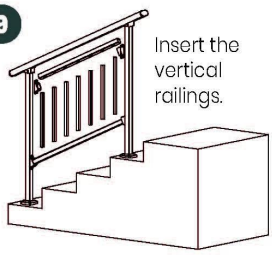
7. Remove hand rail, drill holes straight down, and hammer in bolts. [2]



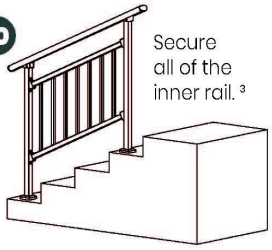
8. Put hand rail over bolts, tighten nuts onto bolts.



9. Insert the vertical railings.



10. Secure all of the inner rail. [3]



[2] Double check posts are parallel and tight against inside rail before marking holes for drilling.

[3] Push and pull top rail & inside rail to ensure all is secure.
