It must be a good choice to choose our round top rail for outside glass fence.

Round channel outer diameter: $\mathbf{2 5 . 4 m m}$, inner rubber groove $\mathbf{1 4 m m * 1 4 m m}$. Square channel outer size: $25 \mathrm{~mm} * 21 \mathrm{~mm}$, inner rebber groove 14 mm * 14 mm .

The channel length ia as per your request, but for easier transport, the Max. length should be 5.8 m .
