

Stainless steel glass clip is widely used in stainless steel glass handrail system for stair, balcony, terrace and pool fence indoor and outdoor. The glass clip is easy for installation, low cost for maintenance.

Flat base is for square post while round base for round pipe. It is friction type and no holes required in the glass panel.

Usually the glass clip can fit **1/4"-1/2" thickness glass**. Regarding to the finish, brushed finish looks more elegant and mirror finish looks shiny. All depends on your choice.

### **3/8" glass clip, flat base**

1. Model: G104

2. Dimension: 50\*40\*26mm

3. Brushed finish on the left and mirror finish on the right
