

Standoff bracket is used to connect glass panels to wall or wood for frameless glass railing systems . It is made of stainless steel material , surface can be brushed or polished .

The common size for standoff is 30mm or 50mm diameter , below are the details .

30mm standoff , SF-30

Wall mount glass railing hardware, glass standoff for outdoor balcony, standoff bracket for indoor stair

SF-30

50mm standoff , SF-50

50mm diameter glass standoff 316 stainless steel mounted into concrete

SF-50

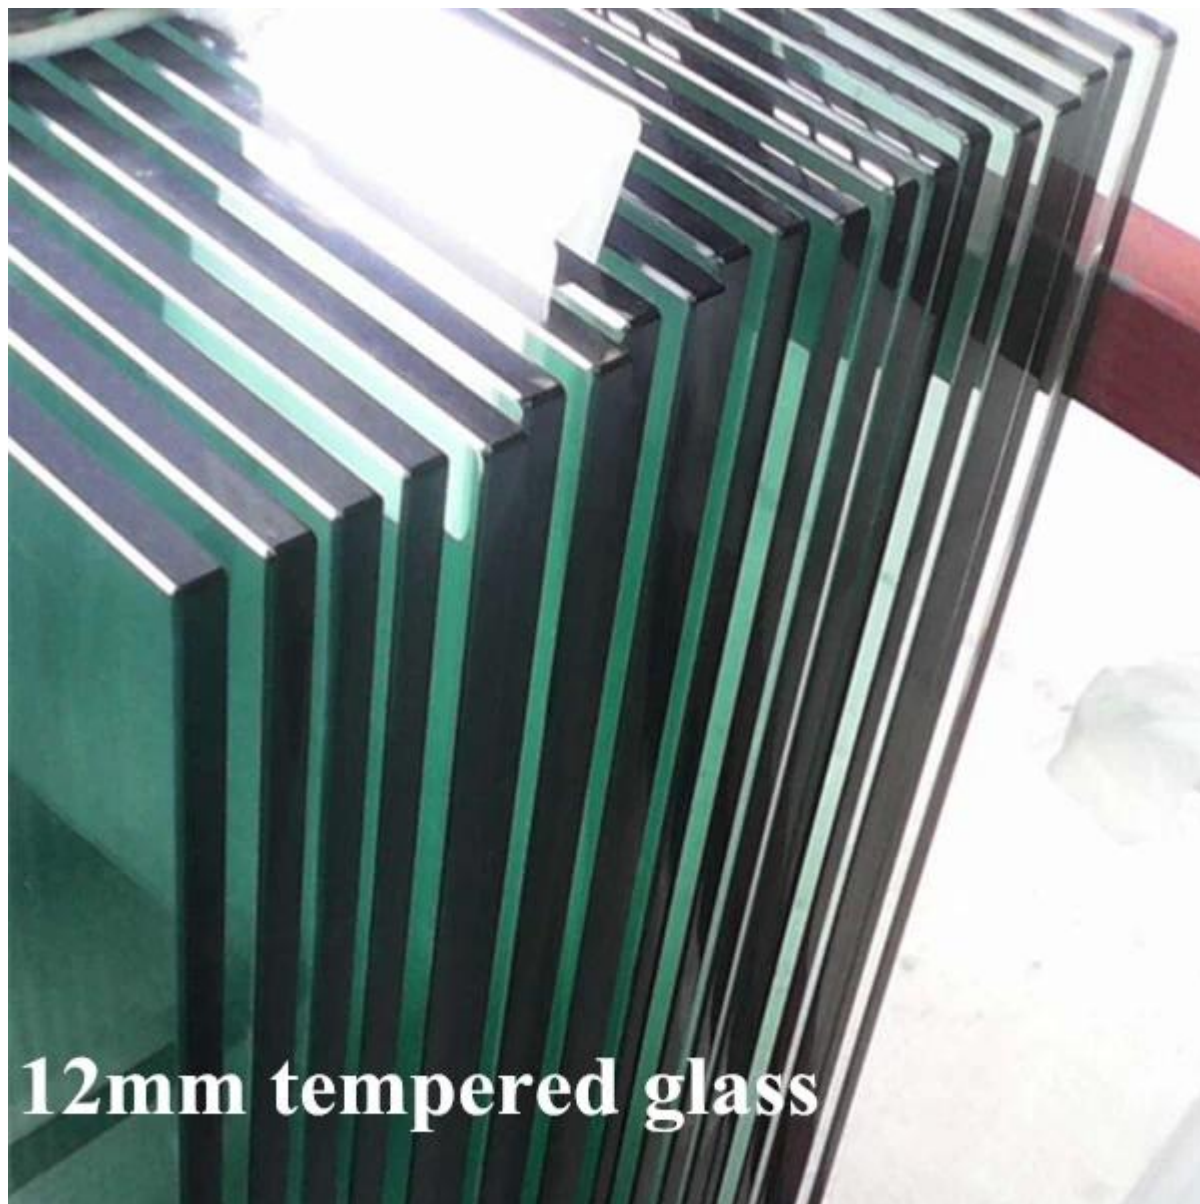

On some occasions customer will use double standoffs with mounting plate, it is much stronger .
[stainless steel standoff, bracket for glass panels, railing design](#)

SF-50T

Glass thickness varies from 8mm up to 19mm depending on where you apply the railings .

We also offer tempered glass clear or tinted .
