

New G-G1 hinge for frameless glass pool fence

As some unexpected issue happened about the old G-G1 hinge, we now developed a new design G-G1 hinge(same Item No.), please see the comparison as below:

We add two wider pieces of back plate to make the hinge more stronger, but for sure the weight of new G-G1 increased(about double than the old one)

About the material: we still use stainless steel 316L, kept the high quality and ability of anti-rust.

More close up picture:

Satin brushed and mirror polished available.
