

Stainless steel spigot 316 and 316L(with strong anti-rust ability) is widely used at indoor and outdoor pool fencing, balcony, deck, stairs, steps etc.

While duplex 2205 is more preferable with even stronger anti-rust ability, used at sea side(close to the salt water).

Both of them are stylish and modern design and with the fundamental safety consideration.

It is treated as not only decorative but also safety guard.
