

It has become more popular to choose stainless steel cable railing system for the design of staircase and balcony. For stair and balcony, dia3-dia5mm cable with tensor are suitable. Usually the post height is between 1m-1.5m high for round and square shape.

You may choose stainless steel top rail and wooden handrail.

Please send us your sketch and we will give you a beautiful stair and balcony as return.

Stainless steel 304 cable railing is for indoor use while SS316 is outdoor use. Both type is highly anti rust and low cost for maintenance, easy for installation.

Before production, we will send you both sample and drawing for double confirmation.
