

Stainless steel 316 friction fit glass spigots are widely used frameless glass balustrade system, such as balcony, pool fencing, stair glass railing.

There is no pre-drilled holes in the glass panel and there are 2 types glass spigots: one is base plate type and the other is core drilling type.

The spigots are designed to hold 10-12mm tempered glass.

1. friction fit glass spigots in brushed finish

2. friction fit glass spigots in mirror finish

3. [round base plate type glass spigot](#)

4. [square base plate glass spigot](#)

5. [round core drilled glass spigot](#)
