

Stainless steel 304 cable railing system with cable tensor is widely used for interior staircase. The cable diameter is from dia3mm to dia10mm and post can be 40x40/50x50mm with 900-1500mm high.

Usually 8-10 cable section per post. The post can be base plate type and side mounted type. Both brushed and mirror finish available.

The cable railing system is very easy for installation, low cost for maintenance.
