

Stainless steel standoff glass bracket with back plate is widely used in frameless glass balustrade system. It is more strong to hold 8-19mm thick glass panel. There are 2 standoff pins in the back plate 200\*100\*10mm.

The standoff is 3.3kg/set and easy for installation, low cost for maintenance. There are 6 holes in the back plate for screws. Usually brushed finish is the most popular.
