

Great choice for staircases, decks, or balconies with our high-quality aluminum cable railing systems.

#### FEATURES:

1. **Aluminum Cable Railing:** Our aluminum cable railing systems are designed to provide a minimalist and elegant look while ensuring safety. The cables are securely fastened to robust railing posts, creating a durable and visually appealing railing solution.
2. **6063 T5 Aluminum Alloy:** We use 6063 T5 aluminum alloy for our railing components, known for its excellent corrosion resistance, strength, and durability. This material ensures that your cable railing system remains vibrant and structurally sound even in harsh environments.
3. **Railing Post Dimensions:** Our railing posts are available in a standard size of 40\*40mm, providing a sturdy foundation for the cable railing system. The robust post dimensions ensure stability and resistance to external forces.
4. **Cable Diameter:** We offer cables with a diameter range of 3-5mm, providing flexibility in design and load-bearing capabilities. The cables are carefully selected to ensure they meet the highest quality standards, offering a secure and reliable railing solution.
5. **Different Types of Cable Fittings:** To cater to various design preferences and requirements, we provide a range of cable fittings. Choose from a variety of options, including stainless steel or aluminum fittings, to create a customized and cohesive look for your space.

6. Minimum Order Quantity (MOQ): We understand the needs of different projects. Our minimum order quantity for aluminum cable railing systems is 10 meters, allowing you to order the desired length without excess inventory.
