

Stainless steel cable railing system for stair is very fashionable and a good way to keep view. Usually you need stainless steel wire rope, stainless steel post and stainless steel cable tensor for the stair project.

1. dia 3-6mm for cable rope
2. round and round post with 800-1500mm high
3. with the matched cable tensor to clamp the wire rope
4. we do custom-made project, so send us the stair dimension of your stairs
5. you may have wood handrail or stainless steel handrail sit on the post
