

shopping mall glass railing system ;

This railing is used for shopping mall decoration or other big building such as business building or hotel decoration etc. We use high quality material stainless steel 316 and do finish both satin and mirror. Toughened glass is choosed as well. 12mm and 15mm thickness is most popular in this building.

We could provide detailed offer for your project. Before quotation, we need your sketch plan to do the measurement and check the price then. If you already have the quantity, we can also give you offer based on quantity. That is easy for us.

Send me an email if you have any inquiry. I will get back to you ASAP.
