

Soft close hinges are applied on swimming pool fencing gate . They are made of high quality stainless steel 316 , with very strong anti-rust ability .

Although it is not hydraulic hinge, it performs quite well and enough and much cheaper .

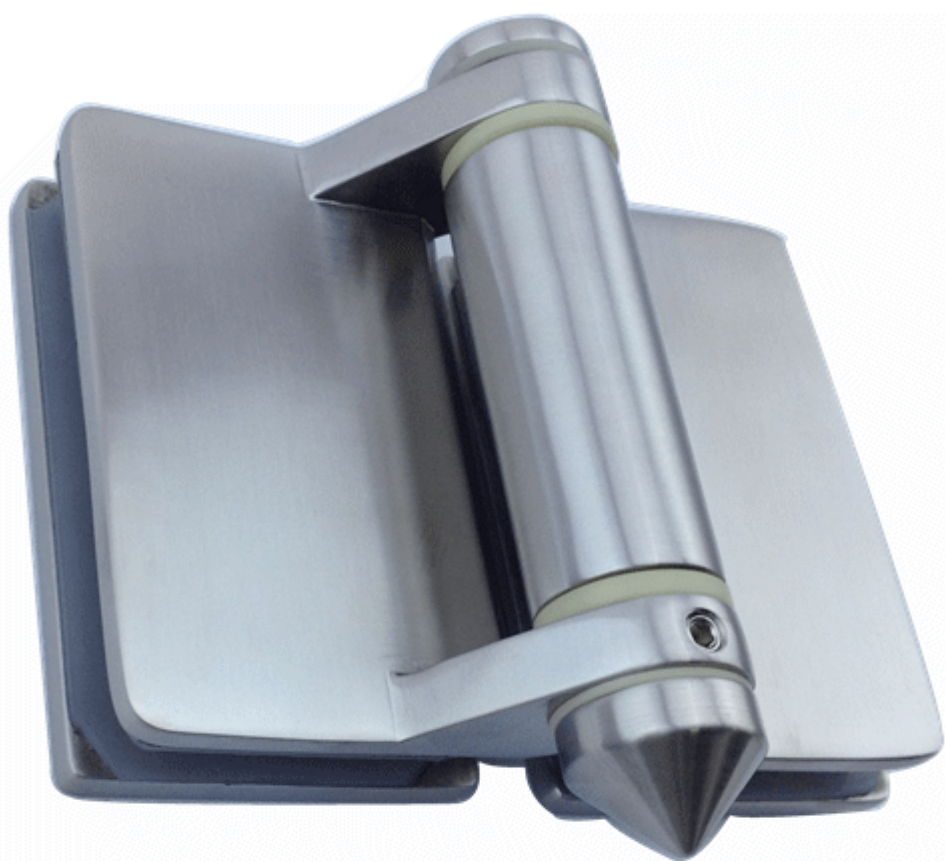

We have 2 types of soft close hinge series , one is stamping glass gate hinges while the other is casting gate hinges .

Stamping hinges are thinner and cheaper , casting hinges are thicker and a bit more expensive .

Below are the photos of gate hinges :
