

Model CB-90 glass clamp or corner clamp is used in the corner of the frameless glass fencing or balustrade.

This model of glass clamp is only used on the top of glass panels which is 90 degree between two glass panels, can't be used in the middle of two glass panels.

The corner clamps are suitable for 12mm tempered glass.

Please see following clamp dimension : 52*52*25mm ; groove size: 14*14mm
