

Square tube joiner is made from high quality stainless steel 304 and 316 material , matt or polished finish .

Usually square tube joiners are used on balustrade systems to connect handrail tubes , or applied on steel structures formations .

The joiners are of very high strength and not easy to rust .

Below are the types of tube joiners we have for your selection :

S401

S402

S403

S404
