

Trilhos de vidro sem moldura com duplex 2205 Spigots para 10mm a 13.52mm Painéis de vidro.

Nossa Spigot de vidro duplex 2205 ajustável é com 4 furos e parafusos extras na placa de base e 1 placa de nivelamento de PC a ser usada na parte inferior da torneira para ajustar o nível quando o solo não é mesmo.

1. Características do corrimão de vidro com espigas de vidro duplex 2205

Material de espigão Principal corpo	Duplex 2205.
Material para parafusos, tampa de base, placa de nivelamento	316 aço inoxidável
Terminar	Revestimento de pó preto fosco ou plaqueamento electro; cetim; espelho
Espessura de vidro	Vidro de espessura 10-13.52mm.
Altura	168mm; ou pode ser personalizado
Junta de plástico	Feito de material de nylon, pode durar tempo ao longo da vida
Parafuso concreto para se adequar	M8 * 100.
Peso Unitário por PC	1.45kg.
Em estoque	sim
MOQ.	2 pcs.

LOADING TEST FOR SBM

Introduction

MTS Metallurgical Testing Services was engaged to witness the installation of a sample pool fence spigot and to subsequently conduct load tests on the spigot to the requirements of Australian Standard AS1926.1 - 2012.

Standard/Specification AS 1926.1 - 2012, Section 3.2 and Appendix B

Results Summary

(For details of individual tests, refer to the tables on the following pages.)

ID	Item/Heat No.	Dimensions/Type/Details	Finish	Overall Assessment
14117/01	SSRM316	70mm Square, Base Plate 316 Stainless steel	316l	COMPLIES

Remarks

After completion of the testing, the spigot was found to be in sound condition with no breakage, tearing or signs of fracture and no looseness of the fixings.

Colin Cousins
Metallurgical Testing Manager

4. Instalação Instruções para Sbm. vidro espigão

fixing method: base plate spigots

Mark out the centre line of proposed glass fence with a chalk line. Determine clamp location based on a sheet size (recommendation on pages 1 & 2). Use base plate as a template to mark out the hole positions and drill holes to suit.

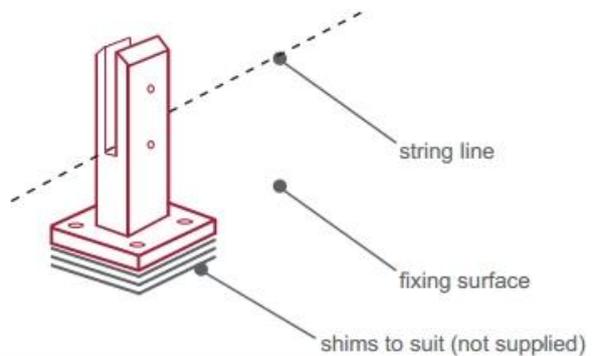

Note: Do not exceed 100mm gaps between glass panels. Optimum gap is 40mm to 60mm

Now the base plated spigots can be fitted to the floor and plumbed via shims (not supplied) under the base plates. Be sure to tighten firmly as the smallest of movement at the base plate will result in noticeable movement at the bottom of the glass fence.

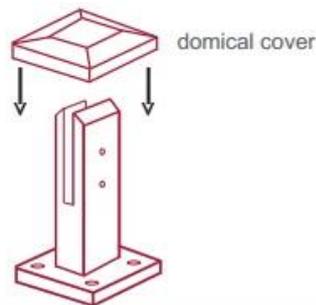

Tip: By setting the two outer spigots of your total span, a string line can be run in the 'throat' of the spigots, giving correct height for all spigots in between

Note: Do not exceed 100mm gap from the fixing surface to the bottom of the glass

When all spigots are installed, slip domical cover the top of the spigot to hide fixings. It will be necessary to turn the adjustment screws on the spigot face all the way in to allow cover to pass over

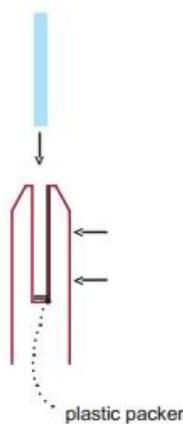

Note: Same installation method applies to round base plate spigot

The glass is then installed to the spigots. Place plastic packers between glass & spigot, at no stage should glass touch the metal

How adjustability works:

1. Place glass in spigot
2. Fix/ tension glass both sides with allen key

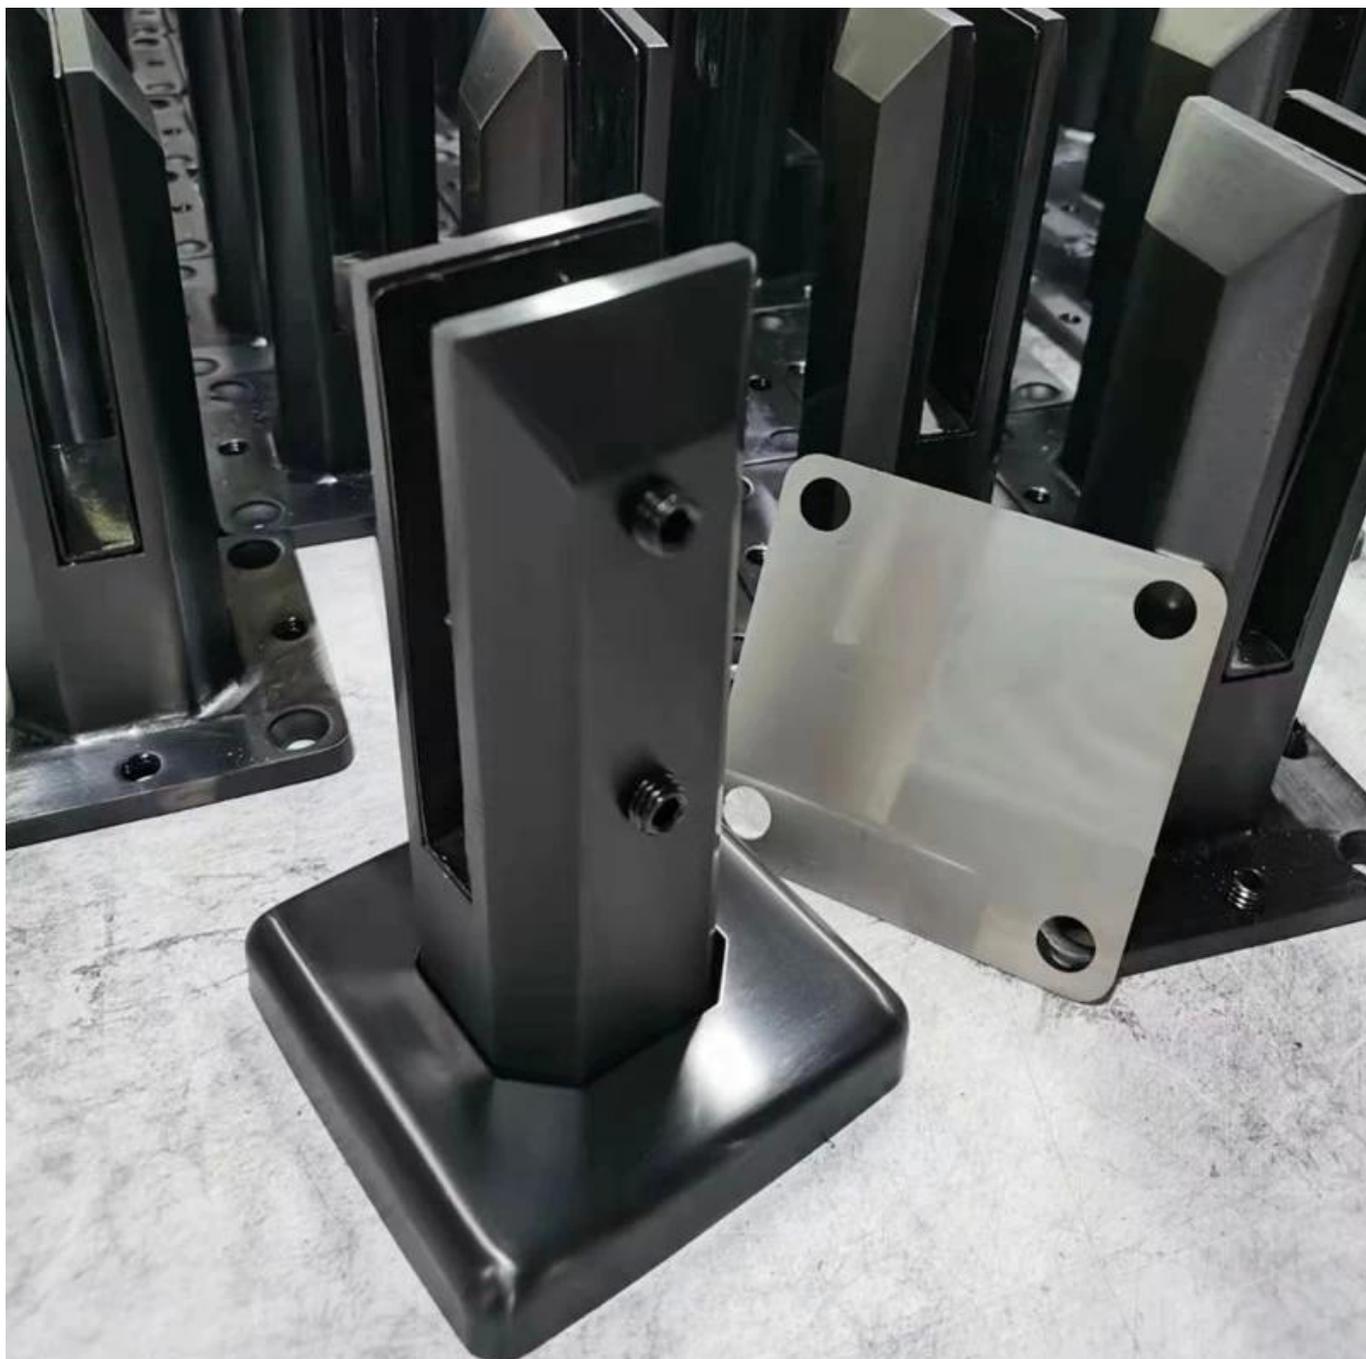

5.EmbalagemdetalhesparaSbm.Spigots de vidro duplex 2205

1 pc em uma caixa branca; 12 pcs em uma caixa
